SUMMARY

Frontend Developer with strong experience in React, JavaScript (ES6), HTML5, and CSS/CSS3. Proficient in building responsive layouts Flexbox and Grid. Skilled in Tailwind CSS for modern, scalable UI development, Familiar with component-based architecture, reusable code, and modern frontend best practices.

TECHNICAL SKILLS

Front End	React JS (Hooks, Components, useEffect, RESTAPI, State Management, Routing, etc.,
Languages	HTML5, CSS/CSS3, JavaScript, ES6 Features
Styling	Tailwind CSS
Layout	Flexbox and CSS Grid, Responsive web designing
Tools	Git and GitHub, VS code, NPM

Key Responsibilities:

- Developed and maintained responsive web applications using React.js, HTML5, CSS3, and JavaScript (ES6).
- Built reusable, component-based UI structures to improve code maintainability and scalability.
- Implemented modern layouts using Flexbox and CSS Grid for cross-device compatibility.
- Styled applications using Tailwind CSS for consistent and efficient UI development.
- Integrated REST APIs and handled dynamic data rendering in React components.
- Collaborated with designers and backend teams to translate UI/UX designs into functional interfaces.
- Debugged, tested, and optimized frontend code to enhance performance and user experience.

Experianxe / Internship Training

HCL GUVI

PROJECTS

1. Task Management App

Individual

Project Description:

- A Task Management Application is a productivity tool designed to help users efficiently organize, track, and manage their daily tasks and activities.
- It allows users to create tasks, set priorities, update progress, and mark tasks as completed, ensuring better time management and productivity.
- The application provides a simple and intuitive interface where users can easily add new tasks, edit existing ones, and delete completed or unnecessary items.
- Tasks can be categorized based on priority (high, medium, low) or grouped into different lists such as personal, work, or study.

Tech stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Responsive Web Design.

Roles & Responsibilities:

- Designed and developed a responsive Task Management web application for organizing daily tasks efficiently.
- Implemented core features such as add, edit, delete, and mark tasks as completed.
- Built an interactive and user-friendly UI using React.js, HTML, CSS, and JavaScript.
- Managed application state effectively using React Hooks (useState, useEffect).
- Integrated task categorization features like priority levels and status tracking.
- Ensured responsive design for mobile, tablet, and desktop screens.
- Handled form validations to prevent incorrect or empty task entries.

2. Dictionary Application

Individual

Project Description:

- The Dictionary Application is a web-based system that allows users to search for word meanings, synonyms, antonyms, and pronunciation details in real time.
- The application integrates with external APIs to fetch accurate linguistic data and provides a simple, responsive user interface for efficient word lookup.
- Users can enter any word into the search field, and the system retrieves relevant information such as definitions, usage examples, phonetics, and related words.

- The project demonstrates frontend-backend integration, API handling, and dynamic content rendering.

Tech Stack: HTML5, CSS3, React JS, Tailwind CSS, REST APIs, Responsive Web Design.

Roles & Responsibilities:

- Designed and developed the user interface using HTML, CSS, and JavaScript.
- Implemented responsive design for mobile and desktop compatibility.
- Handled user input and dynamically displayed results.
- Integrated API responses into UI components.

3. **Movie Review Application**

Individual

Project Description:

- The Movie Review Project is a web-based application that allows users to browse, search, and explore movies with detailed information such as ratings, genres, cast, and release dates.
- The system integrates with external movie APIs to fetch real-time data and provides a user-friendly interface for discovering movies.
- Users can search for movies, view trending/popular films, and add ratings to movies.

Tech Stack: HTML, CSS, React JS, Tailwind CSS, REST APIs, Responsive Web Design.

Roles & Responsibilities:

- Designed and implemented UI using HTML, CSS, and JavaScript / React.
- Created responsive layouts for different devices.
- Displayed movie data dynamically from API.
- Implemented search and filter functionality.

EDUCATIONAL EXPERIENCE

2022-2025	BCA	Ballari Business College, Ballari	9.12 (CGPA)
-----------	-----	-----------------------------------	-------------

APPRECIATION

Recognized for developing responsive and React components, improving development efficiency.

Appreciated for optimizing web performance and enhancing overall user experience.
